[About Us](#)

We offer wheels that are typically constructed from steel, aluminum alloy, or a mix of the two. Every material has benefits and drawbacks. Since alloy wheels are lightweight and have a nice appearance, they are frequently chosen.

High Technology

Improved handling and fuel efficiency are two benefits of lighter wheels. Finding a balance between structural integrity and weight reduction is crucial, though.

- ✓ Tire Repair
- ✓ Wheel Inspection and Repair
- ✓ Tire Pressure Check
- ✓ Wheel Cleaning and Maintenance
- ✓ TPMS (Tire Pressure Monitoring System) Services

Testimonial

Tyrest offers quick and effective wheel alignment services. I immediately saw an increase in the handling and steering precision—I heartily recommend their knowledge.
